

AN IMMERSIVE PHOTO ATTRACTION

BEYOND THE TYPICAL SHOULDER-UP PHOTO BOOTH

A MORE IMMERSIVE SOUVENIR EXPERIENCE

Most compact photo booths frame the guest tightly around the head and shoulders.

Our booth is designed for a wider, waist-up composition. That extra framing makes the guest feel like part of the selected scene — not simply placed in front of it.

THE DIFFERENCE IS IN THE RESULT

WAIST-UP FRAMING CREATES A STRONGER SENSE OF PRESENCE

FROM GREEN SCREEN TO A FINISHED SOUVENIR — IN SECONDS

The guest is photographed against a professional chroma-key wall. Our software replaces the green background with the chosen scene immediately, while preserving a larger portion of the person in frame.
